Request for Informal Review of Septic Permit Denial

By

Randolph County Environmental Health Supervisor

Applicant Name: _____	Phone Number: _____
Applicant Address: _____	
Application Number: _____	

Applicant _____
Signature

Date

Upon receipt of this request, one of our senior staff in the Environmental Health Office will contact you to schedule an on-site review of the previously performed soil/site evaluation. To conduct a thorough review, corners of the proposed structure must be staked according to your previously submitted site plan or plat. Property lines (existing and/or proposed) must also be accurately marked.

An informal review will be limited to those areas of the property that were evaluated recently. Other areas of the property not previously evaluated may be scheduled for evaluation on a future date, provided your permit application has not expired.

If backhoe pits were prepared for our initial evaluation, an informal review will be conducted utilizing those pits. Only dry pits at least four feet deep and two feet wide will be reviewed. If backhoe pits were not utilized for our initial evaluation, we will use our soil augers to review the site. You may arrange, if you desire, for backhoe pits to be dug during our review to allow the best view of the soil conditions on the site.

Please forward this completed and signed request to the address above.
